

HEAVY DUTY[®]

Gravity - Pallet Flow

Pallets up to and exceeding 4000 lbs

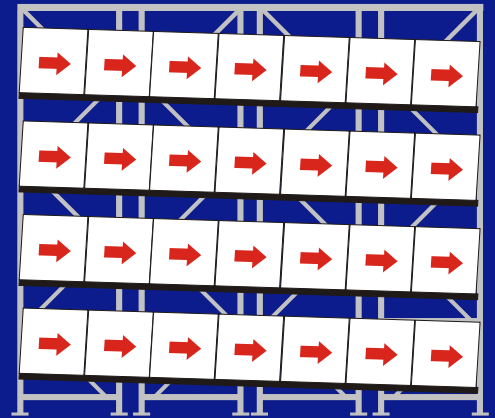

DISTRIBUTION CENTERS • WAREHOUSING • AUTOMOTIVE • METAL FABRICATING • HEAVY MANUFACTURING

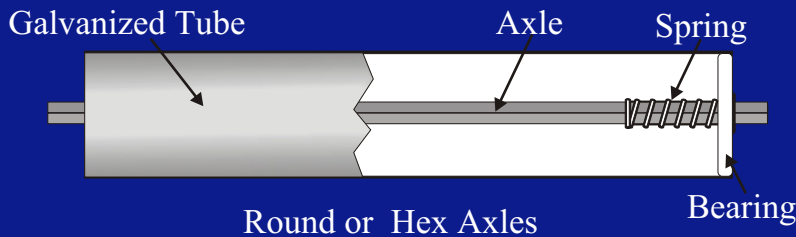

Gravity Flow Systems

Advantages of High Density Storage

- Lower labor costs and space saving
- Increased SKU organization and facing
- First-In, First-Out operation
- Increased throughput
- Less product damage
- Ergonomic design
- Less traffic congestion
- Reduced equipment and energy costs

Full Steel Roller

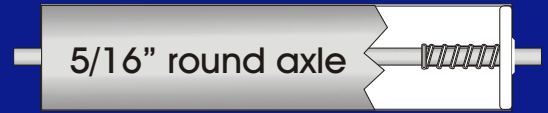

Full steel rollers are ideal for various pallet types

1.375 Inch Diameter

- Available 7" up to 36" BF (Between Frames)
- 18 gauge galvanized steel
- Spring loaded axles

90 LB. Capacity

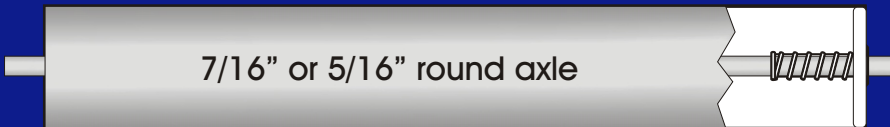

1.9 Inch Diameter

Available 5" up to 60" BF (Between Frames)

- 12 & 16 gauge galvanized steel
- Spring loaded axles

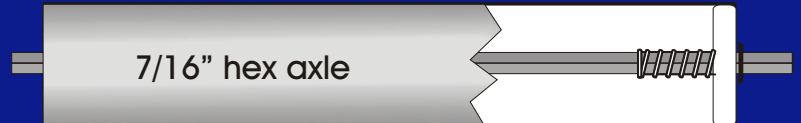

200-350 LB. Capacity

2.5 Inch Diameter

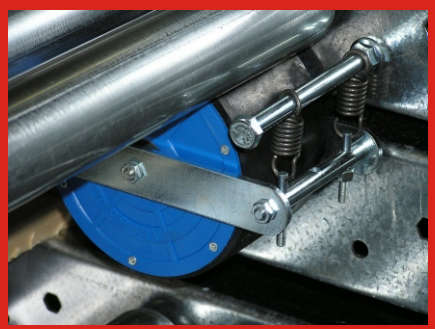

Available 5" up to 60" BF (Between Frames)

- 14 ga. Galvanized steel
- Spring loaded axles

290 LB. Capacity

Options/Accessories

Indirect Mounted Speed Controller
Available in 3 Load Ranges
For Optimum Control
Pre-installed at Factory

Semi-Precision Sealed
1.9" Dia. Bearing for
600 LB. Roller Capacity
